

Bahgat Zakaria Bahgat

Computer Science Student | Junior Data Engineer

bahgatzakaria653@gmail.com • +201206638439 • Cairo • [linkedin.com/in/amir-zakaria](https://www.linkedin.com/in/amir-zakaria) • github.com/bahgatzakaria653-dev

SUMMARY

Computer Science student specializing in Data Engineering, with hands-on experience in ETL processes and Data Warehousing using SQL Server and Python. Skilled in SQL, data modeling, cleaning, transformation, and data quality. Built a complete Data Warehouse solution from scratch, documented on GitHub, and earned DataCamp Associate Data Engineer and Associate Data Engineer in SQL certifications. Passionate about data, problem-solving, and building reliable data engineering solutions.

EDUCATION

Bachelor's Degree in Computer Science

Oct 2023 – June 2027

Faculty of Computers and Artificial Intelligence , Assiut National University — Assiut

PROFESSIONAL TRAINING

Digital Egypt Pioneers Initiative (DEPI)

Feb 2026 – Present

AI & Data Science — Microsoft Data Engineer

- Practical training in Data Engineering, Python, SQL, database management, and data pipelines.
- Developing skills in Big Data Processing, Microsoft Azure, deployment, and AI for Data Engineers.
- Hands-on learning through projects and real-world data engineering applications.

SKILLS

Programming: Python, SQL, C++, Java

Databases: SQL Server

Data Engineering: ETL, Data Cleaning, Data Transformation, Pandas, NumPy, Data Warehousing

Tools: Git/GitHub, Jupyter Notebook, Microsoft Excel

Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Database Systems

Additional Skills: HTML, CSS, JavaScript

PROJECTS

SQL Data Warehouse Project • [GitHub Repository](#)

March 2026

Technologies: SQL Server, ETL, Data Warehousing, SQL

- Designed and built a Data Warehouse solution using SQL Server with end-to-end ETL pipelines.
- Cleaned and transformed data to improve quality, consistency, and structure for analytical reporting.
- Implemented dimensional modeling using a Star Schema for efficient analytical querying.

LANGUAGES

Arabic - Native

English – Very Good

CERTIFICATES

Associate Data Engineer from DataCamp • [Link](#)

April 2026

Completed practical training in SQL, ETL, data transformation, and Data Warehousing through hands-on Data Engineering projects on DataCamp.

Associate Data Engineer in SQL from DataCamp • [Link](#)

June 2026

Completed practical training in SQL for Data Engineering, including data querying, joins, CTEs, window functions, and data transformation using real-world datasets.

Data Engineer in Python from DataCamp (In Progress) • [Link](#)

Completed hands-on training in Pandas and NumPy for data processing, cleaning, transformation, and ETL workflows using Python.

Database Fundamentals from Mahara-Tech • [Link](#)

October 2026

Relational database concepts, SQL queries, joins, and data modeling fundamentals

Python Programming from Mahara-Tech • [Link](#)

October 2026

Python fundamentals, data structures, functions, and basic OOP concepts

Introduction to Web Technologies from ITI • [Link](#)

August 2024

Web development fundamentals including HTML5, CSS3, and JavaScript basics
